

GT Software's NeoData® gives the freedom to access mainframe data and reports whenever and however you want. By translating mainframe VSAM data to standard Microsoft® SQL Server™, NeoData makes mainframe data easy to access and leverage from distributed systems.

Featuring an easy-to-use interface, NeoData® analyzes VSAM data's record definitions and maps them to fully customizable data tables that are easily modified to suit business needs.

## How Can You Benefit From NeoData®?

### Analyze Data Automatically

NeoData analyzes data record definitions and maps them to SQL data tables. It also allows for customization of the mapping to fit your needs.

### Retain and Use Original COBOL Code

NeoData works with standard COBOL indexed file I/O statements, but can read and write SQL data. This guarantees that you'll be able to use your COBOL applications without rewriting them.

### Use Standard Data Structure

Pick from several standard SQL data table structures and modify them to meet your needs. NeoData is fully customizable – you'll get the best database for your business.

### Increase Productivity

NeoData features an easy-to-use interface that makes mapping mainframe index files to SQL data tables simple.

### Automate Data Conversion

The NeoData Converter automates the transition from VSAM indexed files to SQL Server data tables. It's easy to define how VSAM data files are fed into SQL tables, and how those tables are organized.

### NeoData® Platforms Supported

#### Client Operating Systems

- Microsoft® Windows® 7+

#### Server Operating Systems

- Microsoft® Windows® Server 2008 R2+

#### Development Environment

- Microsoft Visual Studio® 2010+

#### Microsoft .NET Framework Support

- Microsoft .NET Framework 4.0+

#### NetCOBOL Supported

- NetCOBOL for .NET V4+

ISV/Software Solutions

GT Software ([www.gtsoftware.com](http://www.gtsoftware.com)) turns yesterday's legacy systems into tomorrow's leading edge applications. Its solutions help organizations extend the value of their IT investments through agile development and standards-based APIs, which improves workflow and enhances operational efficiency. Masters of application modernization and a global distributor of the Fujitsu NetCOBOL compiler, GT Software's proven solutions power mainframe integration with today's technologies. Currently, more than 2,500 organizations globally trust GT Software's solutions to ensure they are able to drive forward innovation that improves customer experiences, increases operational efficiency, and generates revenue.
